Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-24 and 55-59 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-23 of U.S.

Patent No. 6,631,333. Although the conflicting claims are not identical, they are not patentably distinct from each other because as follows.

'333 discloses a method for remote characterization of a gaseous or vapor sample comprising at least one sensor with gaseous or vapor sample, wherein the sample contains at least one analyte and sensor providing a detectable signal, and transmitting data, analyzing the data received at remote location and identifying the at least one analyte present in the gaseous or vapor sample. The only difference between patent claims and claims at present application is patent claim includes additional feature such as computer comprising a resident algorithm capable of characterizing the analyte. However, with the omission of these features in the claims at present application, remaining elements perform the same function as before. Therefore

Art Unit: 2863

omission of reference element whose function is not needed would be obvious to one of the ordinary skill in the art. In re Karlson, 136 USPQ 184 (CCPA 1963). Also note Ex parte Rainu, 168 USPQ 375 (Bd. Apo. 1969). Omission of a reference element whose function is not needed would be obvious to one of the ordinary skill in the art.
